In the Claims:

Please replace Claim 16 with the following claim:

16. (Twice amended) A method for treating a medical condition of the type that is characterized by the destruction of articular cartilage; wherein said medical condition comprises joint injury, reactive arthritis, acute pyrophosphate arthritis (pseudogout), psoriatic arthritis, osteoarthritis or juvenile rheumatoid arthritis; in a mammalian subject, which method comprises administering to the subject having said condition a therapeutically effective amount of a small molecule having a molecular weight of under 2000 grams/mole, wherein the small molecule exhibits an aggrecanase IC₅₀ of less than about 20 nM, said aggrecanase IC₅₀ measured by an aggrecanase chondrocyte assay.
